A TROLL LEARNING CENTER

This two-disk program is perfect for introducing basic map-reading skills. It includes four separate lessons that show students how to recognize and identify land and water features, how to use compass points and the map scale, how to use map symbols to locate cultural and natural features, and how to find such information as temperature, rainfall, population, and elevation on maps.

Colorful graphics, animation, step-by-step demonstrations, and simulation-like activities make it easy for students to master essential map-reading skills.

THIS LEARNING CENTER CONTAINS:

- a 2-disk MICRO-SOFTWARE program
- a User's Guide
